

Patents: Serial No. 09/530,723
After Final – Proposed Amendment For Discussion Only
Docket No. 97055

Proposed Amendment to Claim 1

1. (Currently Amended) A system for routing a call made from a calling line resold to a carrier, the system comprising:

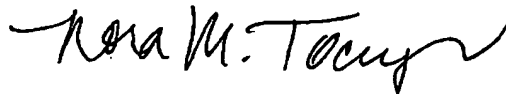

a switch coupled to the resold line, the switch being operative to route the call to an AIN Hub ~~a service-switching point~~;

the AIN Hub ~~a service-switching point~~ having a trigger provisioned thereon to cause the AIN Hub ~~service-switching point~~ to launch a query to a service control point upon receiving the call from the switch; and

the service control point operative to receive the query from the AIN Hub ~~service-switching point~~ and to provide routing instructions to the AIN Hub ~~service-switching point~~ based upon resold line routing information stored in the service control point, the routing information identifying a location specified by the carrier for handling the call.

The Patent Examiner is respectfully requested to reconsider this application in light of the remarks above. If there are any issues that can be resolved via a telephone conference, the Examiner is invited to contact Nora Tocups at 404-372-1430.

Respectfully submitted,

Nora M. Tocups, Reg. No. 35,717
